

HARD WATER? WE'VE GOT YOU COVERED!

SURE SOFT PELLET PLUS WITH RESIN CLEAN

- Helps minimize residue and maintenance
- Certified to NSF/ANSI/CAN 60 by NSF, a leading independent public health and safety organization
- Cleans resin beads to extend the life of water softener systems

SURE SOFT CUBES PLUS WITH RUST BUSTER

- Helps extend the life of your water softener system by minimizing residue and maintenance
- Certified to NSF/ANSI/CAN 60 by NSF, a leading independent public health and safety organization
- Effective for all traditional water softener systems

SURE SOFT CUBES PLUS WITH RESIN CLEAN

- Resin Clean additive extends the life of your water softener
- 100% natural ingredients minimize residue and maintenance on your system
- Effective for all traditional water softeners

GUNTHER SOLAR SALT

- Cost-effective alternative to evaporated pellets
- optimizes brine production for efficient softening
- Suitable for all standard water softener systems
- Naturally produced

NATURE'S OWN POTASSIUM CUBES

- Potassium chloride cubes for desired water softening
- Provides a sodium-free solution for your water needs
- Ideal to use with all water softeners

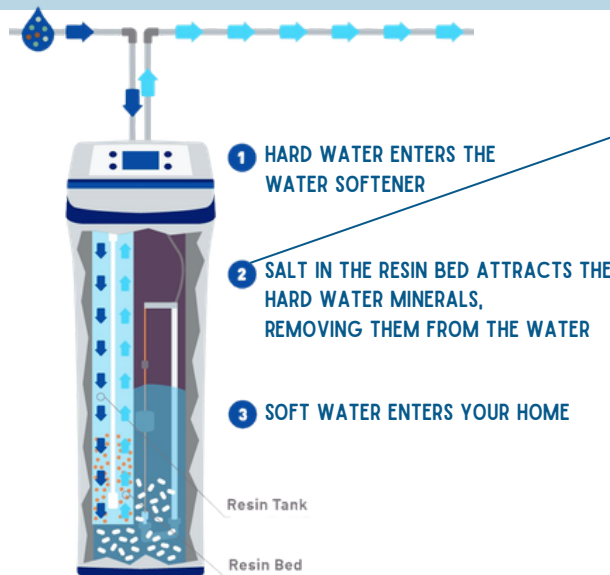

WHY USE SOFTENER SALT?

Hard water can leave behind mineral buildup that

- Damages appliances
- Dulls laundry
- Spots dishes

Water softener salt removes calcium and magnesium from your water, helping your system run more efficiently.

IN THE ION EXCHANGE PROCESS THE ACTIVATED SOFTENER RESIN STARTS TO SWAP WITH SODIUM IONS REPLACING THE HARDENING MINERALS.
