

GF | SUCCESSION PLANTING WORKSHEET

Cool-Season Crops can go in BEFORE the last frost. Beginning late March to early April (weather permitting) and continuing until mid-June when heat causes bolting. Resume mid-August and continue through fall.

- Last Spring Frost: Around April 25 to May 5
- First Fall Frost: Around October 10 to October 20

Warm-Season Crops need to wait until the soil is warm (usually mid-May). Stop by mid-July so harvest finishes before October frost.

Crop	Days to Maturity	Succession Interval	1st Planting	2nd Planting	3rd Planting	4th Planting	5th Planting
Radishes	22-30 Days	7-10 Days					
Leaf Lettuce	30-45 Days	10-14 Days					
Spinach	35-45 Days	10-14 Days					
Cilantro	30-40 Days	14 Days					
Bush Beans (W)	50-60 Days	14-21 Days					
Beets	50-60 Days	14 Days					
Carrots	60-75 Days	14-21 Days
